

What can we learn about people hundreds of years ago,
from their fossilised poo?

What might the poo tell them?

How would they get ancient poo these days?

Why do they have to investigate in this way?

What are they hoping to find out?

Why do archaeologists look at poo from hundreds of years ago?

Ancient Poo Investigation

Ancient Poo Investigation

Why do archaeologists look at poo from hundreds of years ago?

What are they hoping to find out?

Why do they have to investigate in this way?

How would they get ancient poo these days?

What might the poo tell them?

What can we learn about people hundreds of years ago,
from their fossilised poo?
